

TRUE CONNECTED CARDIO WITH EGYM

Available on UNITE 16" and 22" Consoles

With TRUE Fitness touchscreen consoles integrated with EGYM, members enjoy a seamless and personalized workout experience. The intuitive RFID login allows members to easily access their accounts by scanning an EGYM band or fob, instantly connecting them to their personalized training plan and tracking. Cardio workout results are automatically synchronized with the EGYM Cloud, giving members a holistic view of their exercise activity across all sessions. With these integrations, your facility can offer a user-friendly, fully connected fitness solution that guides members toward their goals with simplicity and ease.

FEATURES

SIGN-IN

This custom login integration enables members to log in effortlessly by scanning an RFID tag linked to their EGYM account, creating a personalized workout experience. It offers a seamless, friction-free experience that aligns their on-machine interactions with other member touchpoints, streamlining the overall experience.

TRAINING PLANS & TESTS

Members can select their customized training plan via the EGYM app. Then our EGYM training plan integration automatically retrieves a member's training plan from the EGYM system and displays it on the TRUE Fitness console. This feature offers personalized guidance, making it easy and efficient for members to work toward their fitness goals.

TRAINING DATA & ANALYSIS

Completed workout results are effortlessly posted directly to the EGYM platform with access to history training data. By logging in on the console, members can complete their workout and have their results automatically synced to the EGYM Cloud. This provides a streamlined, seamless workout tracking solution that members will value and enjoy using.
